פרשת תרומה

MESSAGE FROM THE MENAHEL

Dear Parents,

At last! It's אדר!

We all know that חז"ל instructs us to increase in happiness during אדר. Rashi comments that אדר begins the period of miracles for עם ישראל -

עם ישראל and פסח. And, פסח kicks off the ladder of growth called ספירת העומר which brings us to our personal שבועות חס מתן תורה!

But, what is the secret of happiness? Is it about popping a bottle of champagne and enjoying life's pleasures? Not really. Over the last century, technological advances have enabled people to enjoy countless more of life's pleasures, yet for some reason, there is also a consistent increase in depression and suicide.

But, we are fortunate as the עם הנבחר to have the Torah as our guide and its truth on our side. While creature comforts do add שמחה (meat and wine for men, nice clothes and make up etc for women, and snacks and treats for children), true שמחה is attained after fulfilling a מצוה or learning תורה. The words of תורה are "משמחי לב" - gladden the heart. The Vilna Gaon explains in אבן שלמה that although there's no internal physical drive of תאוה for the spiritual, The שמחה comes **afterwards**, and it is very powerful. Physical pleasures, have a תאוה beforehand, and a temporary pleasure, but they are followed by a feeling of emptiness.

Psychologists are understanding this as well. Abraham Maslow composed his famous five-tier hierarchy of needs in 1954 which is the foundation of motivational theory for psychology courses around the world. At the bottom are the needs for physical survival, followed by higher levels. The highest level is self actualization-realizing your potential and seeking personal growth. We as בני ישראל are blessed with the knowledge of what the highest level of self actualization is-fulfilling our personal life's mission, utilizing our natural knowledge, talents, and skills to help others and tap into endless potential within ourselves, dedicating our lives to give נחת to Hashem and living each day to its fullest with תורה and מצוות. These are the secrets of true שמחה. It's אדר! Let's sit down and make an accounting, start the process of internal growth, and you will begin to feel the true שמחה of this special time of year!

Shabbat Shalom!

Rabbi Moshe Abady

Mazal Tov to Mr. and Mrs. Avraham and Rozita Mahgerefteh and family on the birth of a baby boy!

The Story of One Hundred

Students in Pre-1st and first grades recently celebrated the 100th day of school. Why is this a significant celebration for young children?

If you had visited their classrooms and witnessed these students' daily opening activities, you would have noticed that since the first day of school, they have been preparing for this special day. Along with learning the days of the week, months of the year and the date (usually by singing), typical daily activities include using counters to count each day and grouping those counters into bundles of ten until reaching the magic number – 100.

In terms of mathematical concepts this is important because it helps concretize the theory of place value. The students “see” that 10 ones equal one group of ten, and 10 groups of tens equal one group of a hundred, and that one hundred ones also equals a group of a hundred. More importantly, they learn the idea that adding a lot of little things together will give you a large amount! They see how learning one day at a time really adds up! (Think of the recent Siyum Hashas!)

One hundred is a BIG number for children. Imagine how accomplished a child feels after investing in 100 days of learning. The celebrations included all kinds of counting and creative arts and crafts activities. Rather than counting how many more days of school are left, we focus on how many days we have been learning.

Some of you may have received a letter in the mail from the Los Angeles School District containing a Family Income Eligibility Survey regarding Title I for the 2020 – 2021 School Year. Please keep those surveys! B’eizat Hashem, next week I will send out information about filling them out. There have been many changes in the eligibility criteria for Title I. This information is important because it will help determine if our school will receive Title I services next year. Some of our students currently receive educational support from Title I tutors and this funding is crucial.

-Rabbi David Miller

LIBRARY UPDATE:

Dear Parents,

Chodesh Tov! A few things to tell you about the library. Firstly, a reminder that the library is open for parents on Sunday from 9:15-11:15 on the Boys Campus and on Monday from 8:30-10:30 on the Girls Campus. Please come and see our libraries and take out books. We have many books for adults on parenting, relationships, education, novels, hashkafa, great short stories and Shabbat reading. We also have many magazines such as Ami, Mishpacha, Binah, Family First, and Zman.

We’d like to thank the preschool for donating copies of the Tashbar cookbook to our libraries. The kids love them. They get so excited looking to see if their Ima contributed a recipe and are so proud when they see their mother’s name.

Thank you to the Farzadfar family for donating books this month.

May we be zoche to see the redemption of the Jewish people as the Jews were redeemed in the time of Mordechai and Esther.

Mrs. Jodi Gross

Ms. Sue Polinsky

8th GRADE NEWS-CHUMASH/YAHADUT

Rosh Chodesh Adar has arrived and simcha is definitely in the air! We had a blast singing and dancing and of course leading the whole school dance train! We had a great time raising money for Od Yosef Chai this week with our Mini Carnival!

In Yahadut we are learning about...can you guess? You got it! PURIM! We are not just learning it, we are living it as we go into the story with super interesting mifarshim and deep understanding of the message it has for us.

In Chumash we are BH finishing up 'בראשית in פרק ב' There are so many life altering lessons we have learned just by reading the pesukim and delving into the meaning behind each word!! It's really amazing!

The girls are busy now with fundraising, yearbook editing and of course busy learning as well. The girls are also looking forward to their high school interviews. Looking forward to much growth in the coming months.

I'm very proud of my girls.
פורים שמח!

-Mrs. Panahi

8th GRADE NEWS-PARASHA

The Seniors have been astounding themselves with their incredible in depth Parasha skills and their intellectual thinking. The girls ask excellent questions in class that show that they are thinking a lot about who they are and how they can become better. Additionally, the girls are doing an excellent job as monthly Chodesh heads and are working hard to infuse the vibes in Junior High with fun and excitement. We all look forward to the coming months with them!

-Miss Shmagin

8th GRADE NEWS-BEIUR TEFILLA

The 8th graders are shteiging away as they prepare for their report/presentation on a beracha in the amidah. They are learning the skill of learning how to learn on their own! It's amazing! The girls are conquering Tefilla phrase by phrase with our daily program of mastering different parts of Tefilla that we don't focus on in the school curriculum, such as tefillot of shabbat, and hallel. One thing for sure, they are acquiring spiritual taste buds, and would definitely choose a high quality steak over a lollypop I am so proud of all their efforts!!

-Morah Abady

8th GRADE NEWS-SCIENCE

This semester, we are learning about chemistry and electricity. In order to learn about electricity, we needed to know about the structure of atoms, electrons, protons and the periodic table. The periodic table is the table of elements which exist on planet earth. There are about 118 elements on the periodic table. We also learned about atomic number and atomic weight. Atomic number describes the number of electrons and protons in an atom. The number of these two are always equal to each other. If an element has 12 electrons, then it has 12 protons too. Protons and neutrons always stay in the nucleus of an atom and electrons go around the atom. It looks like our solar system. It is fun to learn about different elements and their behavior. We watched a lot of cool video clips in the class about atoms, the history of their discovery and live periodic table.

-Mrs. Kohanchi

8th GRADE NEWS-MATH

The 8th grade students have been working on graphing linear and quadratic equations in the past few weeks. They are now also able to sketch regions defined by linear inequality.

They can verify that a point lies on a line given the equation of the line and derive linear equations using point-slope formula.

The students understand the concepts of parallel and perpendicular lines and how their slopes are related. Recently we have been working on polynomials. They learned the techniques that teach them how to add, subtract, multiply, and divide algebraic terms. They are able to solve multi step problems, including word problems using these techniques.

Next we will learn how to apply factoring techniques to second and simple third degree polynomials. Looking forward to much more progress in the months ahead.

-Mrs. Kohan

8th GRADE NEWS-ENGLISH

This past month's curriculum has been a nod to the nachas of nature!!!!

Students have been busy as bees in anticipation of the upcoming Spelling Bee!

They have also been completing a short story/fiction genre unit from their Mosdos textbook, where they read the poignant piece "The Last Leaf"a short story by O. Henry.

To conclude the unit, 8G students are participating in a synopsis/summary project where they will be sharing their writing and artwork as part of an oral presentation, in the hopes that they will inspire their classmates to read the short story that they will be representing, as a choice for recreational reading.

Trees are not trivial...

Students in 8G English highlighted one of Ms. Haviva's favorite holidays, Tu Bishvat, by "painting with paragraphs" a descriptive essay of the extraordinary existence of trees in terms of what they proudly provide both practically and aesthetically. The objective of the descriptive focused essay, was to weave the ethereal and everyday appreciation of trees throughout the essay alongside the practical goal of multi paragraph structure and support.

Finally.....The Finale. Our "Poetry of the Pomegranate" projects have finally made their way to their final Tashbar display destination in the Junior High Hall, where they look extremely exquisite!!!!

Ms. Haviva Kierzenblat

LUNCH MENU

Monday-Roast chicken, green rice, salad

Tuesday-Lasagna, salad

Wednesday-Kabob, rice, tomato

Thursday-PURIM BONANZA-HOT LUNCH FOR ALL STUDENTS!

Friday-Pizza, salad

PARASHA TREAT!

This week's Parasha treat was tools...

Ask your child to tell you more!

STUDENT SPOTLIGHT

Pre1-Rivka Bracha Masjedi

1st-Maayan Benlulu

2nd-Tehilla Wander, Talia Heravi

3rd-Liora Paktan

4th-Eliana Farzadfar

5th-Avigayil Cohen

6th-Liel Ben Eliyahu

7th-Shira Vahedy

8th-Hanya Leiner

UPCOMING EVENTS

March 5th-Purim Bonanza/Dress Up Day

March 9th-Taanit Esther, 1:30 Dismissal

March 10th-11th-Purim/Shushan Purim, No School

PTA UPDATES

Another amazing evening with bonding and fun this past Monday at Mother & Daughter night! The evening began with a yummy pizza dinner and tons of poses and pictures at our photo booth. Next, we played two interactive and collaborative games where mothers and daughters were able to work together, while at the same time interact with new people and families. We had 9 winners and they each received a gift certificate to Munchies! We then proceeded with our main activity which was tie dying canvas tote bags. Everyone got all the necessary supplies to stay clean, as well as rubber bands to design their bag however they liked. Colors were flying everywhere, smiles were contagious and everyone left with a beautiful memento from the event. We had 120 attendees and the room was packed to the limit! We've been overwhelmed and humbled by the enormous show of support and we're looking forward to more successful events B'ezrat Hashem in the future!

A HUGE shoutout to the special ladies who worked so so hard to put this night together: Mrs. Yvette Zargari, Mrs. Miriam Hadjyan (as well as our awesome photographer!), Mrs. Rachel Bekhor, and Mrs. Jessica Hyam! Thank you, thank you!!

For more information about other volunteer opportunities that are available to you, please feel free to reach out to us! We can't wait to hear from you.

The Purim Shuttle deadline has been extended to Monday, March 2nd. Gifts will be given to our wonderful teachers and staff on Wednesday, March 4th. To participate and have your name included on their cards make sure to get your forms in to the office or via Venmo by Monday!

Mrs. Aviva Asaf

Mrs. Sara David

ADAR DOOR CONTEST!

ROSH CHODESH ADAR ACTIVITIES/CRAZY HAT DAY!
